

Khulna University of Engineering & Technology, Khulna

Department of
Electronics & Communication Engineering

Project Report on:

Designing Curriculum Vitae using HTML & CSS

Course No: **CSE 3100**

Course Title: **Internet Programming Laboratory**

Submitted By

Md Sajib Rahman

Roll: **1909028**

Year: **3rd** Term: **1st**

Submitted To

Md Nazirul Hasan Shawon

Lecturer

Dept. of CSE, KUET

Md. Repon Islam

Lecturer

Dept. of CSE, KUET

Objective:

To create a Curriculum Vitae using HTML & CSS.

Theory:

HTML, or **HyperText Markup Language**, is the standard language for creating web pages. It uses tags to define the structure and content of a webpage. Elements like headings, paragraphs, images, and links are crucial components. Tags come in pairs, with an opening and closing tag. Attributes provide additional information about elements. A typical HTML document includes a declaration, ``<html>``, ``<head>`` (for metadata), and ``<body>`` (for main content). Hyperlinks are created using ``<a>`` tags. Images are added with ```` tags, specifying a source (src) attribute. Lists can be ordered ```` or unordered ````, both using ```` for list items. HTML5 introduced semantic elements like ``<header>``, ``<footer>``, ``<section>``, ``<article>`, and ``<nav>``.

CSS, or **Cascading Style Sheets**, is a vital web technology. It complements HTML by styling web pages, controlling elements' appearance like colors, fonts, and layout. CSS rules consist of selectors (targeting elements) and properties (defining appearance). Syntax involves curly braces and property-value pairs. The "cascade" resolves conflicting styles from various sources. Inheritance allows child elements to adopt parent styles unless overridden. The box model governs an element's space with properties like margin, border, and padding. Different units like pixels, em, and percentages offer layout flexibility. Media queries enable responsive design for various screen sizes. CSS frameworks like Bootstrap and preprocessors like Sass enhance styling capabilities.

Software Used:

Visual Studio Code 2022

Code:

HTML & CSS codes are given below:

Index.html

```
<!DOCTYPE html>
```

```
<html>
```

```
  <link rel="stylesheet"
href="https://fonts.googleapis.com/css2?family=Material+Symbols+Outlined:opsz,wght,FILL,GRAD@48,400,0,0">
```

```
  <link rel="stylesheet" href="style.css">
```

```
  <head>
```

```
    <title>Sajib's CV</title>
```

```
  </head>
```

```
  <header><h2 align="center"><u>Curriculum Vitae</u></h2></header>
```

```
  <body>
```

```
    <p class="centered" ><a href="https://ibb.co/Yhmxj6h"></a><br><br><br><br><br><br><br>
```

```
    <h2><b>Md Sajib Rahman</b></h2> <span class="material-symbols-outlined">call</span><a
href="tel:01521751530"> 01521751530</a> <br><span class="material-symbols-
outlined">mail</span><a href="mailto:sajibrahmansl25@gmail.com">

1.Source code:

<https://github.com/sajibrahmansl25/sajibrahmansl25.github.io/tree/main/MYCV>

2.Output:

<https://sajibrahmansl25.github.io/>

Discussion & Conclusion: By this lab project, I've implemented my knowledge of HTML & CSS and designed my CV. I've taken help from w3school website.

Output:

Curriculum Vitae

Md Sajib Rahman
